

**TO:** All Inmates

**FROM:**   
George M. Little  
Secretary of Corrections

**DATE:** April 14, 2022

**SUBJECT:** Vaccine Booster

---

The Centers for Disease Control recently announced the recommendation of a second booster vaccine for those who received their initial booster at least four months ago. This recommendation is for those who are 50 years of age and over, as well as those with underlying medical conditions that increase their risk for severe disease from COVID-19.

Each SCI Medical Department will identify those within the population that are recommended for this next booster, and will begin offering them during chronic care clinics or physicals. If you do not have a chronic clinic or physical scheduled, you may send an Inmate to Staff Request to the ICN for scheduling.

As with previous booster vaccines, a \$25 incentive will be provided to those that receive the vaccine.
